

Nestor Martin's cast iron is renowned worldwide for its exceptional quality. Since the beginnings of our first foundry in 1854, our production process has always been at the avant-garde. Moreover, our cast iron is made with 95% recycled materials, in keeping with our commitment to protect the natural environment.

The S model is a fresh, modern take on the cast-iron stove. Rounded lines gracefully outline the robust castings, which subtly hide the technical advances concealed within.

The S model is available in four sizes with four heat outputs. The S stoves are available in painted graphite, anthracite enamel, majolica green enamel or majolica brown enamel.

MODEL	S13	S23	S33	S43
AxBxC (mm)	594x480x349	683x594x394	752x631x393	802x735x458
D (mm)	482,5	558	629	666
G Ø int. (mm)	125	150	150	180
Weight (kg)	96	124	148	186
Max. heat output (kW)	5	7	10	12,5
DIN heat output, nominal (kW)	3,5	6	8	10,5
Heating Capacity (m ³)*	45	75	100	130
Efficiency (%)	75	75	80	80
Emissions CO (%)	0,186	0,23	0,07	0,06
Δ Flue Gas Temp (°C)	197	204	250	240
Certification	CE / DIN	CE / DIN	CE / DIN+	CE / DIN+
Max. log length (cm)	25	33	33	50

* Approximate heating capacity, based on average insulation
All models can be vented from either top or rear of the stove
